

## **COVID 19 Surveillance**

Is the patient experiencing any new symptoms?

If yes, what are the new symptoms?

Are the patient's existing symptoms getting worse?

If yes, which symptoms are getting worse?

If fever is getting worse, when was the patient's temperature last taken and what was the temperature reading?

If the patient has new or worsening symptoms, would they like to speak to their provider via phone about those symptoms?

Is the patient still self-quarantined as instructed?

If no, where has the patient been?

Does the patient agree it is okay to have someone contact them again tomorrow?
